Life Is On Schneider Electric

IT Advisor Administration

EcoStruxure IT Education Services, provides you with the latest training and knowledge, enabling you to maximize the use and benefits of your EcoStruxure IT software solution. The eLearning on-line training platform and self-paced courses allow you the flexibility to complete the training when and where you need, with an individual and dedicated training environment. Take advantage of a combination of written and illustrated, content, video demos and a range of useful information links to enhance your training experience. Maximizing your understanding through experiential learning.

Hands-on

Gain knowledge as you learn in your own dedicated environment.

Who should take this course:

This course is designed for software professionals who are new to IT Advisor Administration or experienced EcoStruxure IT Software users or administrators requiring a refresh in their knowledge of IT Advisor technology. The self-paced course module takes you through IT Advisor Administration principles and practices, including software installation and configuration, use of the WebAdmin tool, and connectivity setup for external systems.

Experiential Learning

Gain the skills you need by using the actual software.

In this course you will:

- Gain an understanding of IT Advisor administration principles.
- Learn how to build, configure, and install a virtual machine for the IT Advisor application.
- Learn how to install the IT Advisor application onto the server platform.
- Learn how to manage the server environment using the Webadmin tool.
- Learn how to download and install the IT Advisor desktop client.
- Learn how to perform and test basic server settings.
- Learn how to setup & configure external systems connectivity and IT Advisor API's
- Learn how to configure and manage IT Advisor Users and User Groups
- Learn how to create and manage Colocation Tenant users.

Increase Productivity Quickly

Easily update your skills or bring new people up-to-speed faster.
