

Customer spotlight: Universidad Industrial de Santander improves business operations

Universidad Industrial de Santander

Customer: Universidad Industrial de Santander
Industry: Education
Country: Americas (Latin America)

Universidad Industrial de Santander faced challenges in deploying new applications for business-critical and mixed workloads. It needed to implement a solution that would efficiently address the needs of its test, development, and quality assurance (QA) environments. The university selected HPE Private Cloud PC3000 with HPE Alletra dHCI.

"HPE Alletra dHCI is a versatile, scalable, and high performance infrastructure solution that simplifies IT for applications by reimagining HCI without limitations, making it suitable for a wide range of business-critical applications and mixed workloads."

– **Carlos Jaime Barrios Hernández,** General Chair, Advanced Computing System for Latin America and Caribbean, Universidad Industrial de Santander.

Challenge

Universidad Industrial de Santander faced challenges in managing its complex IT infrastructure, optimizing performance, and scaling resources to meet growing business demands. The university sought a reliable partner to provide efficient solutions, enabling it to focus on core competencies and drive innovation.

Solution

Hewlett Packard Enterprise emerged as the preferred choice for Universidad Industrial de Santander. The university selected HPE Private Cloud PC3000 with HPE Alletra dHCI to provide the necessary infrastructure and capabilities for its test, development, and QA processes. The HPE solution streamlined the university's IT infrastructure, improved performance, and scaled resources to accommodate growth.

Outcomes

As a result, the organization experienced enhanced operational efficiency. After deploying HPE Alletra dHCI, Universidad Industrial de Santander experienced a significant performance improvement of 50% to 75%. In addition, it realized remarkable efficiency benefits with capacity savings between 10x to 12x, showcasing the outstanding results achieved through the collaboration with HPE.[1]

Vision
Optimize IT performance and scale resources to meet growing business demands

Strategy
Engage with a reliable partner to provide an efficient solution

Outcomes
- Improves performance by 50% to 75%
- Delivers 10x to 12x capacity savings
- Supports business-critical and mixed workloads, as well as test/dev and QA
