

COSMOS ALPHA

The legendary name returns under FreeForm 2.0 in 2025. The COSMOS series, once hailed as the ultimate expression of PC case modularity, evolves into the “halo” platform for enthusiasts and modders. With its iconic design language and enhanced modularity, COSMO ALPHA is engineered for boundary-pushers who want limitless control over layout, cooling, and customization.

COSMOS ALPHA will serve as the aspirational apex of what FreeForm 2.0 stands for — freedom, scale, and personalization without compromise, making it an ALPHA case for all ALPHA builders

FEATURES

Signature Flagship Design

Premium materials including curved aluminum frames from top to bottom and tempered glass panels carry forward the legendary COSMOS identity with a modern upgrade. ARGB under-case lighting further enhances the case’s elegant aesthetic.

FreeForm 2.0 Spirit

All internal components are rotatable that can be easily flipped left or right, allowing users to build various system layouts effortlessly based on their own preference and display requirements

Modular Sliding Tray System

Sliding motherboard tray to free up the space inside the case and enable seamless system reconfiguration between air and liquid cooling layouts. Builders can also fine-tune the distance between GPU and side panels with ease – whether to optimize airflow or highlight GPU upfront.

Maximized Compatibility & Clean Layout

Support E-ATX/EEB motherboards, 400mm GPUs, and 240mm PSUs. Includes removable dust filters and 53mm cable clearance behind the tray. Provide builders with uncompromised platform for wide-open FreeForm creation.

Sliding Adjustable Fan Bracket

Fan bracket is adjustable to accommodate case fans in different sizes, and the sliding design allow users to easily move the fans closer to heat spots for better airflow to cool down the system.

Optimized Thermal Architecture

Pre-installed dual extra-thick 200x38mm fans. Accommodate 15 fans at most and support radiator size up to 420mm to ensure ultra-high airflow and versatile cooling flexibility for any build.

Next-Gen Connectivity

Equipped with 4x USB 3.2 Gen1 Type-A 5G & 2x USB 3.2 Gen2x2 20G Type-C ports
