

DUX ULTRA™

the smarter **RUGGED** macbook case

Built-in closure mechanism designed to keep case firmly closed for increased drop protection

The Smarter Case for MacBook Neo

Your MacBook Neo is built to turn heads. The Dux Ultra keeps it looking that way. A clear shell proudly shows off your Neo's character while reinforced corners and a secure fit mean it's protected from the moment you go out the door to the moment you open it back up.

Smarter Features

- » **Built tough, stays clear** - Reinforced polycarbonate shell and rubberised bracket absorb the hits so your Neo doesn't have to. Your Blush, Citrus, Indigo, or Silver finish stays front and center.
- » **Form-fit, not force-fit** - Engineered to follow every curve of your MacBook Neo for a carry that feels intentional, not afterthought.
- » **Stays put. Every surface** - Textured rubber feet grip smooth desks, café tables, and lecture hall surfaces so your Neo doesn't take an unplanned trip off the edge.
- » **Breathes easy** - Open hinge design keeps airflow moving so your A18 Pro can do what it does without breaking a sweat.
- » **Snaps on, stays on** - Improved TPU clip-on design installs in seconds and locks in with an innovative closure that holds firm through drops, bags, and the chaos in between.
- » **No compromises on cooling or coverage** - Protection that works with your machine, not against it.
