LinkIT Fiber Cord OM2 SC/ST 5m Duplex, mm, LSZH

OM2 is a multimode fibre with a core diameter of 50 µm. The smaller core diameter provides better range than OM1, but remains fairly limited for high bit rates. OM2 fibre is fully compatible with newer types of multimode fibre since all of these have a core diameter of 50 µm. Most of our OM2 cords are supplied with an orange outer jacket and high-quality pure connectors. They are supplied with clips that make it easy to change polarity.
