LinkIT ColorFlex U/UTP Cat6A Grey 2m AWG 28/7, LSZH, 3.6mm

This solution is optimal for environments that require high-density cabling, such as data rooms and server rooms. The cable has an outer diameter of 3.6 mm, making it ideal for space-saving installations. By using colourful clips, cables can easily be organised and identified, simplifying maintenance and troubleshooting. To ensure that cabling meets the highest standards for performance and reliability, Fluke DSX-8000 channel testing is used. This tool verifies cable installations and contributes to optimal network performance. In addition, the solution is designed to ensure better airflow and cooling performance, reducing the risk of overheating and improving the overall performance and lifespan of the equipment.
