

# HPE 2650W Hot Plug Titanium Plus Power Supply Kit (798095-B21)

## Power Supplies

### What's new

- HPE 2900-3400W Hot Plug Platinum power supplies for HPE Apollo 6000, provide redundancy and dynamic power capping.

### Overview

How do you increase power efficiency on the HPE BladeSystem c7000 Enclosure or HPE Synergy 12000 Frame? HPE Performance Power Supplies provide highly efficient and flexible power options specifically designed for HPE Blade Enclosures. The c7000 Enclosure supports up to six Gold (92%) or Platinum (94%) 80 PLUS certified power supply options and the Synergy 12000 Frame supports up to six Titanium (96%) 80 PLUS certified power supply options, providing high efficiency power solutions. [1] Performance Power Supplies provide you the flexibility of operating in different data center power infrastructure with multiple AC and DC power input voltages. Each power option supports hot plug

installation and removal, providing fast, tool-less access to your power supplies. Support for HPE Power Discovery Services is available, which allows you to map the power topology inside your rack, speeding implementation time and greatly reducing the risk of human errors that can cause power outages.

Features

Highly Efficient and Flexible Power Supply Options

HPE Performance Power Supplies give you the choice of selecting up to six Platinum, 94%, or Titanium, 96%, 80 PLUS certified power supply options, providing high efficiency power solutions that lower your power requirements and decrease data center operating costs.

Provides you with the ultimate flexibility of operating in different data center power infrastructure environments with multiple options for AC and DC power input voltages.

Supports hot plug installation and removal providing fast, tool-less access to your HPE Performance Power Supplies.

Supports HPE Power Discovery Services solution on all Platinum and Titanium power options allowing users to automatically map the power topology inside their racks, speeding implementation time and greatly reducing the risk of human errors that can cause power outages.

## HPE Pointnext

**HPE Pointnext** leverages our breadth and depth of technical expertise and innovation to help to accelerate digital transformation. A comprehensive portfolio that includes – Advisory, Professional, and Operational Services is designed to help you evolve and grow today and into the future.

### Operational Services

- **HPE Flexible Capacity** is a new consumption model to manage on-demand capacity, combining the agility and economics of public cloud with the security and performance of on-premises IT.
- **HPE Datacenter Care** offers a tailored operational support solution built on core deliverables. It includes hardware and software support, a team of experts to help personalise deliverables and share best practices, as well as optional building blocks to address specific IT and business needs.
- **HPE Proactive Care** is an integrated set of hardware and software support including an enhanced call experience with start to finish case management helping resolve incidents quickly and keeping IT reliable and stable.
- **HPE Foundation Care** helps when there is a hardware or software problem offering several response levels dependent on IT and business requirements.

**Advisory Services** includes design, strategy, road map, and other services to help enable the digital transformation journey, tuned to IT and business needs. Advisory Services helps customers on their journey to Hybrid IT, Big Data, and the Intelligent Edge.

**Professional Services** helps integrate the new solution with project management, installation and startup, relocation services, and more. We help mitigate risk to the business so there is no interruption when new technology is being integrated in the existing IT environment.
