## UT Series

Fire-resistant UPS with The Most Durable Capability For Protection

Featuring the best-in-class plastic housing, the UT UPS Series provides an outstanding fire-resistant capability to minimize the possible damages of valuable assets in case of any fire incident.

With CyberPower's innovative Battery Management Technology, the UPS significantly optimizes the charging process and battery performance. The configurable alarm allows users to switch ON/OFF the audible alarm when UPS is on battery mode to avoid any disturbance. Its generator compatibility also provides an extensive application scenario during a power outage.

With the built-in Automatic Voltage Regulation (AVR) stabilizing the AC power and maintaining a safe voltage, the UPS ensures safe power levels through Boost and Buck function for the connected equipment without resorting to battery power.
