TGS **RGB**
ATX PC CASE

PC Case For Demanding Gamers!

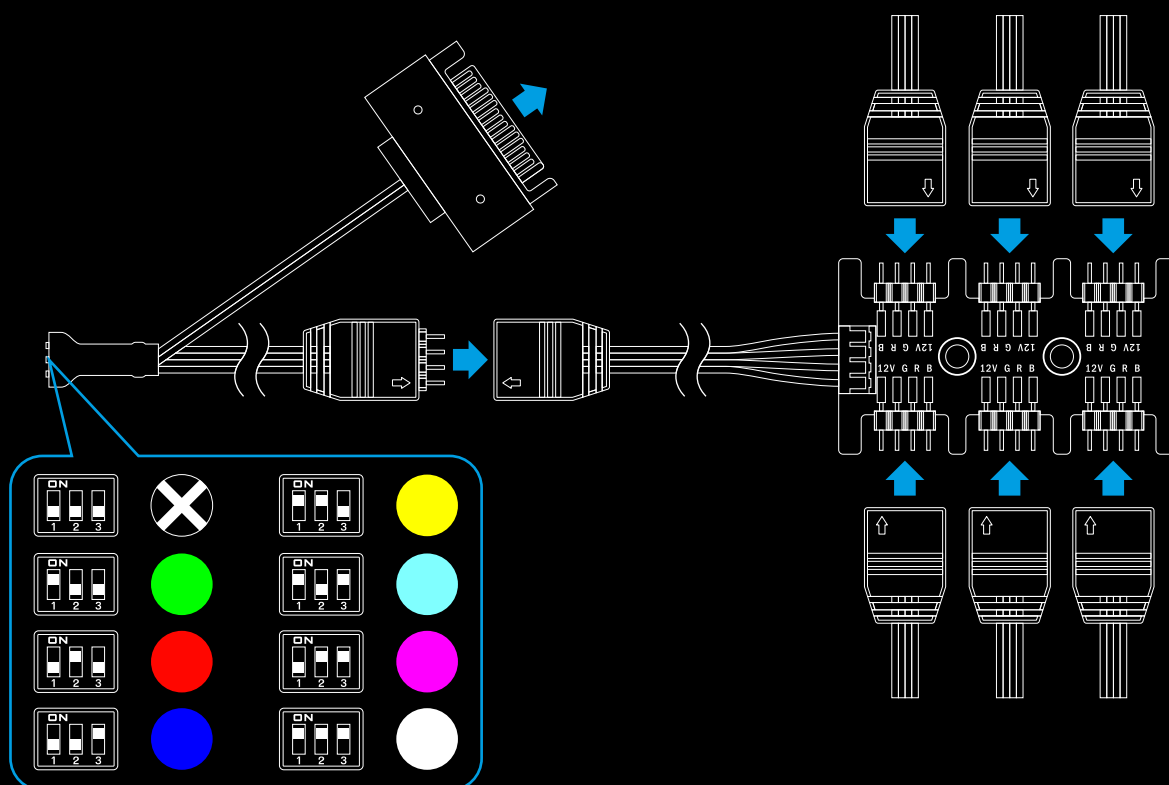

6-Port RGB Hub

The pre-installed RGB fans, provided LED strip plus two additional RGB elements are easily controlled and synchronized inside the TG5 RGB via the mainboard software, thanks to the included 6-port RGB hub for mainboards with a 12V-G-R-B connector, and can illuminate up in approximately up to 16.8 million colors.

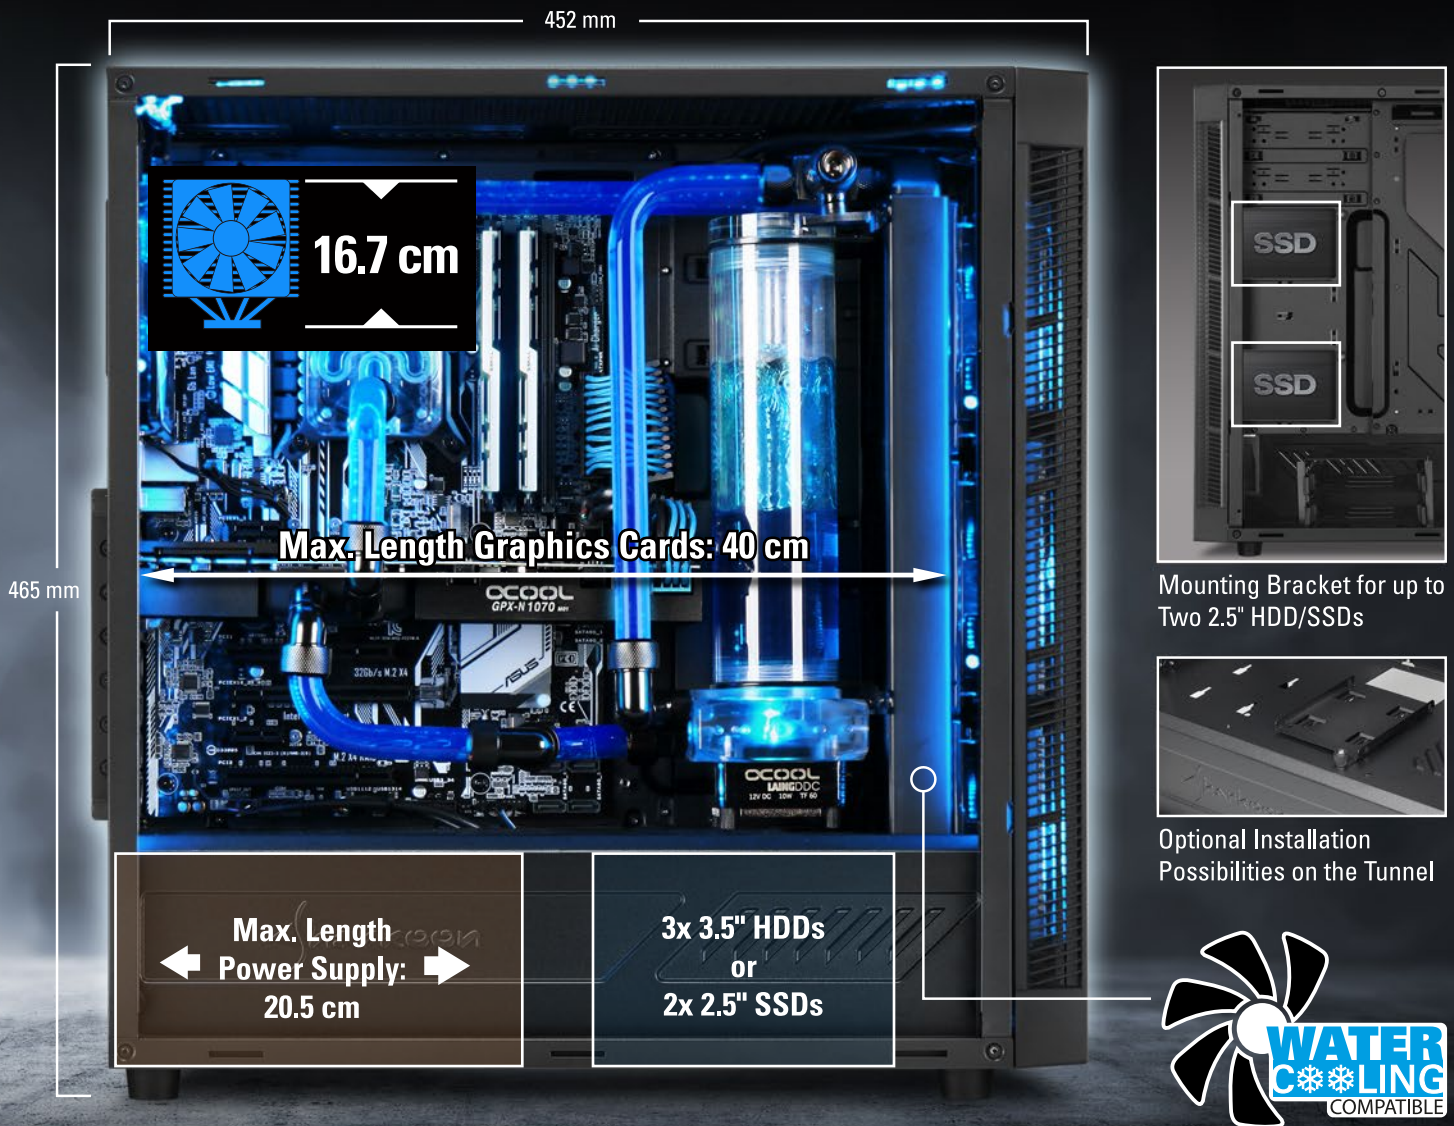

Manual Color Control

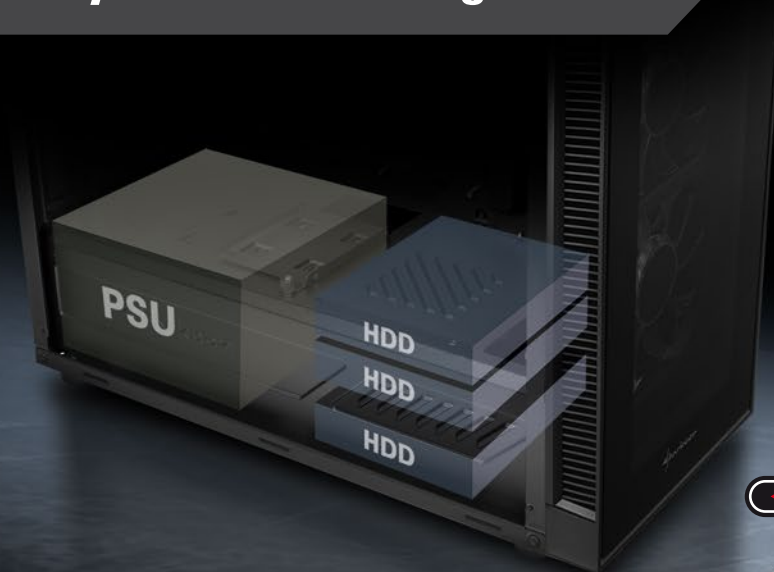

The TG5 RGB has a manual color control for mainboards without any 12V-G-R-B connector. Once installed inside of the case and connected to a SATA connector from the power supply, the included LED strip as well as other LED elements and the fans can be illuminated in one of six colors, or completely in white, via a handle on the manual color control.

Versatile Installation Options

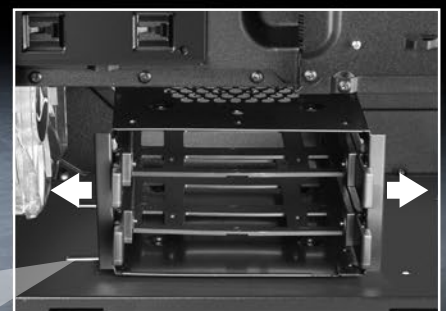

Systematic Arrangement

The power supply and up to three 3.5" hard drives can be decoupled on the case bottom inside the tunnel, thus not detracting from the appearance.

Air Vents for Optimal Cooling of Drives

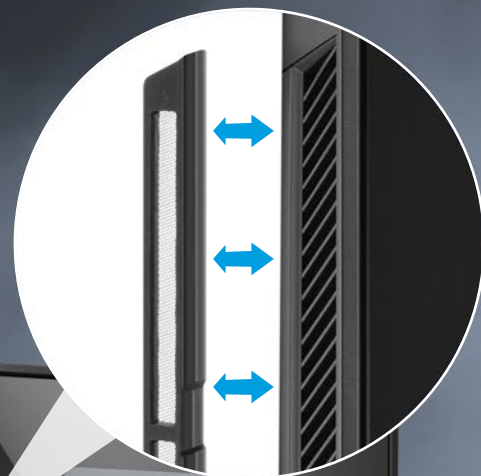

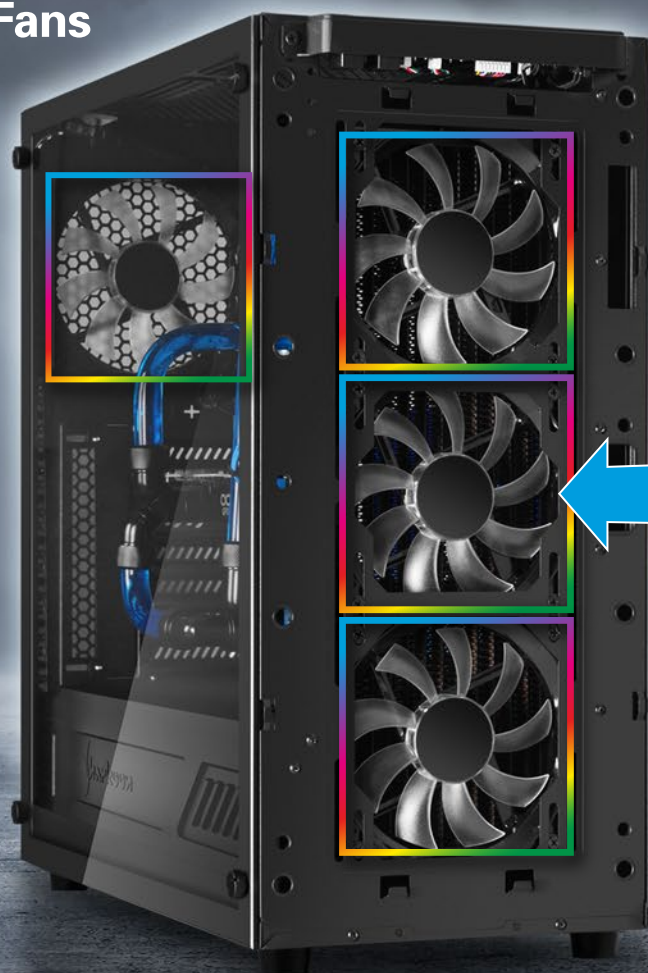

Oval Hole Cutouts for Perfect HDD Cage Positioning
