Susie-Q

Susie-Q is the Smart Radio & Connected Speaker you've been dreaming of; with designer aesthetics, comprehensive functionality and an audio experience like no other.

You can enjoy radio broadcast locally with DAB / DAB+ Digital Radio and traditional FM Analogue. All stations are easily found with auto-scan features and on digital radio all your available stations are listed alphabetically. Susie-Q also features Internet Radio which gives access to thousands of stations which can be searched, or browsed by geographic location or genre.

It's hard to imagine you'll ever tire of the radio with so much choice from anywhere in the world, but when you do want to supplement you're listening with your own music, audiobooks or podcasts – Susie-Q will act as your smart speaker with a range of connection options. You can stream wirelessly from your phone, tablet or other smart device via Bluetooth or NFC. The addition of a USB charge port means you can even power-up your device as you stream. If you're a Spotify Premium user you can also take advantage of the built-in Spotify Connect functionality.

No matter what you choose to listen to it will sound fantastic, as the new premium HiFi quality product in the VQ range we've combined expert British design with premium components and innovative technology. Susie-Q delivers a home filling 80W audio output generated by dual ultra-wide full range 30W stereo speakers and custom mounted dual 10W extended range tweeters. In addition to attention to detail in every aspect of the speakers from cone fabric to the type of magnets used, Susie-Q features digital sound processing with a built-in full functioning equaliser.

Susie-Q is also part of the Frontier Silicon UNDOK multi-room system, this open source platform means you can connect your Susie-Q to a range of other brands products to create a comprehensive audio system. You can control Susie-Q and the wider multi-room set-up via the UNDOK app available on Android and iOS.

Susie-Q features so much technology you could easily gloss over the aesthetic detail, but this is where the true craftsmanship of the design shines through. Susie-Q is available in real wood finishes (Oak & Walnut), these premium finishes have a natural feel with an exposed wood grain. In addition the front fascia is beautifully modelled with a stylish combination for real enamel and flared chrome detailing. All the elements of the user-interface are also equally well crafted, including; the 2.4" OLED full colour screen, tactile soft touch buttons and the convenient jog-wheel.
